TECHNICAL SERVICES

Relationship-based. Technology-driven

Relationship-based. Technology-driven

At AXISTECH, we are a solutions-centered technical organization and are constantly adapting to the evolution of multiple technology systems by continuously improving our understanding of new industry standards and codes. Whether you are modernizing, transferring or growing your communications infrastructure, AXIS Technical Services can recommend a customized solution for your current and future networking plans.

Networking Solutions. Leveraging Technology

AXISTECH offers a broad range of services in structured cabling, fiber optics, wireless, security, and audio visual. Current trends show sustained growth in the usage of Fiber Optic cables leading to faster, leaner, and future-proof infrastructures. Fiber-based systems can support the current bandwidth needs of Data Centres, such as 40G and 100G, and meet the environmental targets of LEED installations. As compared to copper, fiber optics offer more than 1,000 times as much bandwidth and can transfer data more than 100 times further.

Depth of Experience. Large Project Capabilities

Langara.
THE COLLEGE OF HIGHER LEARNING.

“...Your staff was magnificent at coordinating activities during a fairly chaotic transition time. The workmanship displayed speaks for itself – AXISTECH technicians are obviously proud of what they do and deliver a quality product. They are also nice people, and we enjoyed having them on site...”

Michael Marriott, Associate Director
Information and Computing Services,
Langara College

“..The AXISTECH staff has demonstrated on numerous occasions their extensive knowledge of the cabling industry, commitment to quality and customer satisfaction. I highly recommend AXIS Technical Services, and would not hesitate to contract their services in the future...”

Chuck Berkowski, Senior Network Analyst
Canadian Broadcasting Corporation

“... I can confidently recommend AXIS Technical Services as a solid and dependable contractor who are experts in their field...”

Edmund Goh, RCDD NTS, OSP, TPM, AscT
ITS Consultant, Fraser Health Authority

Fiber Optics Installation

Trusted Leaders for Your Fiber Optic Cabling

In today's networked world, fiber optic cabling is essential for transmitting information over longer distances and at higher bandwidths. AXIS Technical Services is a recognized leader in fiber optic cable installation, combining rigorous attention to detail with proven technical skill. Regardless of your project's application or scale, we can create the custom solution that will work for you.

Structured Cabling

Cabling Infrastructure that Changes with Technology

Structured cabling provides the foundation for your business, and the overall platform to meet all your data communications needs. A well-designed and carefully implemented network cabling system will support present and future bandwidth requirements. AXIS Technical Services installs your data cabling quickly and effectively, using only industry-leading designs.

Data Centers

Complete Server Room Installations

AXIS Technical Services is a leader in server room or data center cabling. Whether you have a new Data Center project or need a “structured cabling rescue,” AXIS Technical Services has the right resources on hand. Our staff are highly-trained, industry certified, and customer-driven.

Wireless Infrastructure

The Right Solutions Deployed Quickly and Professionally

AXIS Technical Services can provide the answer to your wireless networking questions, overseeing all aspects of project management from budget and time considerations to product resources. With our experience in the industry, we provide the right technical resources resulting in a wireless infrastructure that will be cutting-edge, fully-mobile and tailored to your application.

Security Systems

Your Source for Future-proof Security Systems

AXIS Technical Services offers the full range of security sub-systems: Intrusion detection, Access control, Video surveillance and Monitoring. We combine these elements to suit your business, building integrated security systems for increased safety and loss prevention. We cater to a wide-range of industries, including health-care, education, government, retail, commercial and industrial.

Audio Visual

Forward Thinking System Integration. Custom Built for Your Business.

With technology's rapid pace of change, audio visual projects have become more complex. Our team will analyze your technical requirements, and overall goals before creating a solution that is best suited for your needs. Our audio visual and multimedia solutions are used extensively in government, educational institutions, healthcare facilities, lecture theatres, public displays, and beyond.

Taking Ownership. Streamlining Operations

> The AXISTECH Team

AXIS Technical Services was founded in 2005 based on a need to bring more accountability and to streamline operations in the communications infrastructure industry. AXISTECH has risen to become the pulse of the communications infrastructure industry in BC.

AXISTECH has extensive expertise in providing integrated and scalable solutions to the communications infrastructure community. Ranked as the 5th fastest growing company in British Columbia by Business in Vancouver. They are also proactive team members who employ a needs-based system of business development and are open to creating a process-driven approach to achieving mutual success for all teams. With a complete understanding of the information systems industry, the management team brings a wealth of knowledge in communications cabling design and installation, business operations, technical skills and Customer Relationship Management.

We at AXISTECH have a policy of total accountability for project completion. Our experienced team is focused on resolving site challenges quickly and efficiently. To help meet the needs of our clients, a customer-care policy includes 24 / 7 / 365 accessibility.
